WORKSHOP

DESARROLLO ÁGIL DE APLICACIONES CLOUD NATIVE CON OKTETO CLOUD

Ramiro Berrelleza
Cofounder & CEO @ Okteto

SG VIRTUAL CONFERENCE

1, 8 Y 15 DE JUNIO DE 2021.
ONLINE | FREE ACCESS
https://sg.com.mx/sgvirtual

ENTERPRISE EDITION

Notes from the Field

- Applications are evolving towards microservices and other cloud-native patterns.
- Skew between development environments and production introduce extra work and expensive production issues.
- Developers spend a lot of time "getting ready to do the work" instead of delivering value.
- CI and shared Integration environments become the bottleneck.

A Developer's Wishlist

- Fast **onboarding**.
- **Realistic** development/testing environments.
- **Instant feedback** while coding locally.
- **Independent** from local machine.
- **No Kubernetes** knowledge required.

The Okteto Development Platform

Okteto is a developer platform powered by Kubernetes that lets your organization deploy fully configured, realistic development environments with one click.
